About the Council for Aid to Education

The Council for Aid to Education, Inc. is a tax-exempt, not-for-profit corporation dedicated to promoting an effective partnership between corporate and foundation funders and the education community in the task of improving America's educational system.

Founded in 1952 by the chairmen of Standard Oil Company of New Jersey (Exxon), General Motors, U.S. Steel (USX Corporation), the Container Corporation of America, and the Armstrong Cork Company, the Council was originally designed to encourage private-sector support of higher education. Today the Council has expanded its mission to become a resource for companies and private foundations interested in making effective contributions to the quality of American precollege and higher education. This broadened mission also includes the provision of a range of information services to educational institutions interested in cultivating private support.

Supported by large and small corporations as well as by private foundations, the Council helps education funders target key areas of educational concern and identify promising approaches to educational improvement. It points corporations and foundations toward the issues and opportunities in which they have a compelling interest and on which they can have an impact, and alerts funders to the implications of emerging educational challenges. By tracking trends and themes in private support of education over time, the Council can help private funders and educational institutions communicate with each other more clearly, plan more effectively, and assess the results of their efforts in a larger and more meaningful context. Through its publications, seminars, research, and consultations, the Council works to ensure that private investments in education produce results.

Order Form/Address Update

This order form will enable you to obtain copies of *Voluntary Support of Education, 1991, Volume 2: Detailed Survey Results by Institution,* which contains 29 statistics on each of the more than 1500 institutions participating in the 1991 survey. If your institution participated in the 1991 survey, Volume 2 is available for $35; the price for non-participants is $50. ***All orders must be prepaid.***

NOTE: VSE 1991 Volume 2 has been available since March. If your institution set up a standing order or subscription last year, you would have received Volume 2 in March automatically. An order form to establish a standing order or subscription will come to you with the 1992 survey form. Set one up at that time to receive VSE 1992 Volume 2 as soon as it is available. Once established, a standing order or subscription continues until you tell us to cancel it.

Even if you are not ordering Volume 2, please take a moment to help us update our files:

- To whom should we address Council mailings on voluntary support (questionnaires, research reports, publications order forms, etc.)?

Voluntary Support of Education, 1991

Volume 1–National Estimates and Survey Summary

July 1992 *Copyright © 1992 by the Council for Aid to Education*

Foreword

Several changes mark this 32nd edition of Voluntary Support of Education (VSE), continuing an effort begun last year to make VSE survey results more useful to educational institutions and funding sources alike.

- In the National Estimates section, we now provide an overview of all educational institutions in the U.S., including voluntary support estimates for education segments not previously covered.
- We again explore trends in giving to higher education in relation to enrollment and expenditures for 4-year and 2-year institutions separately. By next year we hope to be able to provide separate estimates for various types of public and private four-year institutions.
- Annual survey results are placed more clearly in their historical contexts. The report is peppered with charts showing trends over time.
- Aggregate public/private comparisons (e.g., average support per institution for all 4-year public and all 4-year private institutions) have largely been eliminated. Such comparisons lead to misunderstandings because the mix of institutional categories (research/doctoral, comprehensive, etc.) on the public and private sides greatly differ. Public/private comparisons are better made only within a given institutional category, and even then cautiously because of the variety of institutions within categories.
- New tables in the higher education section report on giving by governing board members and on the significance of large gifts.
- The elementary and secondary school section has new tables on parent and trustee giving and summary tables on types of private schools not previously included in the VSE survey. (As an aside, we are reviewing the independent school survey form with the National Association of Independent Schools and the Council for Advancement and Support of Education. The 1991-92 form will contain some new items that schools have requested.)

Introduction

The Voluntary Support of Education survey is designed to obtain information on the amounts, sources, and purposes of private gifts, grants, and bequests received by educational institutions. Voluntary support excludes income from endowment and other invested funds, support received from federal, state, and local governments and their agencies, and contract research.

The 1991 survey collected data on funds raised from private sources for the fiscal year beginning July 1, 1990 and ending June 30, 1991 (with a few of the institutions reporting on different fiscal calendars). Questionnaires were mailed to almost 3,000 institutions of higher education and over 2,400 private elementary and secondary schools (see Table A). The precollege mailing was more than double that of past years as the Council seeks to expand the universe of schools surveyed. Effective college and university participation was 44 percent overall, but varied considerably by type of institution (see Table B). Total effective elementary and secondary school participation was 22 percent, and also varied considerably by type of school (see Table C).

In no year since the survey was begun in 1954-55 have as many as half of the institutions of higher education responded. In recent years, the actual response has numbered between 1,000 and 1,200 colleges and universities out of approximately 3,000 invited to participate. Despite yearly fluctuations in both size and composition of the group of institutions participating, the Council estimates that the amounts reported have averaged about 85 percent of the total voluntary support received by all colleges and universities (an estimate confirmed in 1989 with a follow-up survey to non-respondents). The Council will be working again in 1991-92 with various higher education associations to encourage greater participation.

The response rate for elementary and secondary schools is not neatly comparable to prior years because of the groups of schools newly invited to participate. There was significant decline in private independent school participation in 1991 (although 65 schools participated that had not the previous year). For the rest of the precollege groups, this year establishes a baseline for gauging future increases in participation. The Council is working with a variety of associations to increase participation among these schools.

Since 1990, the Council's annual report on the Voluntary Support of Education survey has been split into two volumes. Volume 1, containing national estimates and an analysis of the survey results, is published three to four months after Volume 2, which contains 29 data elements on each participating school, college, and university.

Volume 2 is published first (March 1992 for this year's report) because participants are eager to make use of the survey data and Volume 2 is relatively easy to produce once the data have been reviewed.

Total Unique Schools	536							

† Membership totals for a particular affiliation group may be the sum of many figures in the table: schools in the primary affiliation group with no additional affiliation, plus schools in the primary affiliation group with additional affiliations, plus schools in other primary affiliation groups with the affiliation in question as an additional one.

Additional Sponsoring Organizations

The Council for Advancement and Support of Education (CASE) is a professional educational association with 2,850 institutional members which offers programs of professional development and acts as a public affairs arm for U.S. education. Participants in its programs include fundraisers, alumni administrators, communicators, government relations officers, and the managers of these functions in postsecondary and secondary institutions. CASE is headquartered in Washington, DC.

The National Association of Independent Schools (NAIS), Boston, is a nonprofit voluntary membership association of nearly 1,000 schools in the U.S. and overseas serving a total enrollment of 355,000 students. Its administrative and academic services to member schools include research reports, periodicals, and manuals; an employment clearinghouse for school administrators; and leadership and professional development for teachers, administrators, and school trustees.

1991 National Estimates

Overview

The value of charitable contributions (both cash and property gifts) from all private sources to elementary and secondary schools and higher education institutions in the United States during the 1990-91 academic year was an estimated $12 billion.

- This estimate is based on results from the annual Voluntary Support of Education survey and surveys conducted by the Department of Education, the National Association of Independent Schools, and the National Catholic Educational Association. (See Reference Note at the end of this section for more details.)

Table 1 provides an overview of the major segments of the education system in the U.S., showing estimates of number of institutions, enrollment, total expenditures, and voluntary support for each. For some segments, where survey data are sparse or non-existent, the estimates should be considered tentative, but good enough for gross comparisons.

- The value of in-kind services is not included in the voluntary support estimates. The value of such services is significant and probably growing, especially for public elementary and secondary schools.
- Also not included in the voluntary support estimates is fund-raising revenue that would not be considered charitable contributions by the IRS.

Total combined expenditures (for both current operations and capital purposes) by public and private elementary and secondary schools and colleges and universities reached an estimated $402.3 billion in 1990-91. Estimated combined voluntary support of these institutions (for both current operations and capital purposes), at $12 billion, represented approximately 3 percent of expenditures.

Table 1

Overview of Education and Voluntary Support in the U.S., 1990-91

Total Voluntary Support as a Share of Total Expenditures	3%	<0%	16%	10%	4%	4%	8%	1%

NOTES: Higher education does not include proprietary and other noncollegiate post-secondary institutions. The total expenditure estimates include educational & general expenditures, transfers, and additions to plant value. The total voluntary support estimates reflect charitable giving for both current operations and capital purposes, including gifts to endowment. Catholic voluntary support does not include subsidies from parishes and dioceses, estimated at a total of $1.35 billion in 1990-91.

*All figures are estimates and vary in reliability. Those marked with an asterisk are very rough estimates.

**NAIS = National Association of Independent Schools.

***Full-time equivalent student figures used for HE calculations.

For public and private elementary and secondary schools, voluntary support represented just 1 percent of total expenditures — 8 percent of the expenditures of private elementary and secondary schools alone and well under 1 percent of the expenditures of public elementary and secondary schools.

- Direct private support of public schools is a recent phenomenon and probably the smaller part of private support for the "school reform" movement in the U.S. Much more than the estimated $300 million going directly to these schools is probably granted to other organizations working for or with public schools on improving the quality of elementary and secondary education.

For colleges and universities, voluntary support represented an estimated 7 percent of total expenditures — 12 percent of expenditures at private colleges and universities and 4 percent at public colleges and universities.

- Because of the diversity of higher education institutions in terms of mission, governance, and history, among other characteristics, the comparisons Table 1 currently allows need further disaggregation, which the Council intends to pursue next year.

Higher Education (HE)						
Public		Private		Total		
2-Year	4-Year	2-Year	4-Year	Public	Private	Total HE
968	595	177	1,479	1,563	1,656	3,219
4,937	5,803	207	2,726	10,740	2,933	13,673
5,100	9,753	1,172	1,843	6,871	1,771	4,248
18.7	83.3	1.4	52.2	102.0	53.6	155.6
265 2%	3,590 30%	45 0%	6,300 53%	3,855 32%	6,345 53%	10,200 85%
6,745	18,107	8,560	24,033	13,835	22,950	16,028
96	780	275	2,901	523	2,717	1,051
1%	4%	3%	12%	4%	12%	7%

- For example, by looking separately at different types of four-year institutions (research, liberal arts, etc.) and by breaking out voluntary support and expenditures as they concern different institutional purposes, it should eventually be possible to make comparisons across types of institutions in terms of expenditures and voluntary support for instruction and research, among other purposes.

One of the values of the current estimates is that they allow an assessment of the extent to which voluntary support might be able to replace other revenue to various segments of the education system.

- For instance, private support of public elementary and secondary schools — currently estimated at $7 per student — would have to increase almost eight-fold to reach just 1 percent of estimated expenditures per student. It is, therefore, extremely unlikely that gift income will ever cover a significant portion of public elementary and secondary school expenditures. Charitable contributions targeted at improving elementary and secondary education can have a significant positive effect, but their role will necessarily be marginal.
- Similarly, state support of higher education amounts to approximately $43 billion of a total $155.6 billion in expenditures. If state support were to fall just 1 percent ($430 million), voluntary support of higher education would have to rise by more than 4 percent in order to make up the difference. And since most state dollars are going to public institutions, private support of public higher education would need to climb by more than 11 percent to replace a 1 percent decline in state support.

It is unwise to expect voluntary support to replace declines in other revenue streams.

- While voluntary support in total does tend to increase almost every year, there is no assurance that it will increase at those institutions experiencing a revenue drop from other sources.
- Nor is there any assurance that voluntary support increases will be for the same purposes as those for which other funds might be cut back.
- The role voluntary support plays, both in its significance and in the purposes for which it is given, varies greatly across different types of institutions.

The Council's estimate of $12 billion in voluntary support of schools, colleges, and universities is a different measure from the $13.28 billion estimate of contributions to education recently released by the American Association of Fund-Raising Counsel (AAFRC) and reported in their annual publication, *Giving USA*. To the extent they overlap, however, the two estimates appear to be consistent with each other.

- The AAFRC figure, which depends in part on Council estimates of giving to higher education, covers a calendar year (1991) while the Council's estimate covers an academic year (July 1990 to June 1991).

- Moreover, the AAFRC estimate includes giving to libraries, research institutes, education-related organizations, and several other categories not included in the Council for Aid to Education estimate.

Reference Note

The estimates contained in Table 1 have been derived from various sources. In brief:

Numbers of institutions, enrollments, and expenditures were derived from the *Digest of Education Statistics*, Office of Educational Research and Improvement, U.S. Department of Education, 1991, and from *Characteristics of Private Schools: 1987-88*, Office of Educational Research and Improvement, U.S. Department of Education, 1990. Exceptions: Number of Catholic schools and their enrollments and expenditures were derived from information provided by the National Catholic Educational Association (NCEA), Washington, DC. NAIS figures were derived from statistical reports published by the National Association of Independent Schools (NAIS), Boston, MA.

Voluntary support estimates were derived from the 1990-91 Voluntary Support of Education survey, from NAIS studies of annual fund contributions, and from survey information provided by NCEA.

The estimate of voluntary support of public elementary and secondary schools is necessarily a guess, as national data do not exist. The Council for Aid to Education estimated corporate contributions to public elementary and secondary schools at approximately $200 million in 1990 (see *Corporate Support of Education, 1990*, Council for Aid to Education, NY, 1991). The other major donor group for public schools would be foundations. We doubt that double the corporate amount is going to these schools from foundations, and our estimate of corporate contributions may in fact be high; some of those $200 million may actually have gone to education-related organizations. School districts in New York State reported about $10 million in private gifts and grants in 1990-91, and that must be one of the largest state totals. The actual national total is probably somewhere between $200 and $400 million, and in any case a tiny fraction of expenditures.

Expenditure and voluntary support estimates for Other Non-Religious and Other Religious Schools are also made in the absence of national data. We made assumptions about where these segments would stand on expenditures and voluntary support in relation to NAIS schools and Catholic schools.

Higher Education

Voluntary Support Overall

▬ Voluntary support of higher education climbed an estimated $400 million for the academic year ending June 1991, from $9.8 billion in 1990 to $10.2 billion (Figure 1 and Table 2).

▬ The $400 million increase represents a rise of 4 percent. Support rose 10 percent in the 1990 academic year.

- In constant 1991 dollars as deflated by either the Consumer Price Index (CPI) or the Higher Education Price Index (HEPI), both of which rose 5 percent, support actually decreased by 1 percent.
- Since 1986, support has grown 38 percent in current dollars and 8 percent in constant dollars (HEPI).

▬ Voluntary support clearly responds to economic trends (Figure 2):

Figure 1

Estimated Voluntary Support of Higher Education

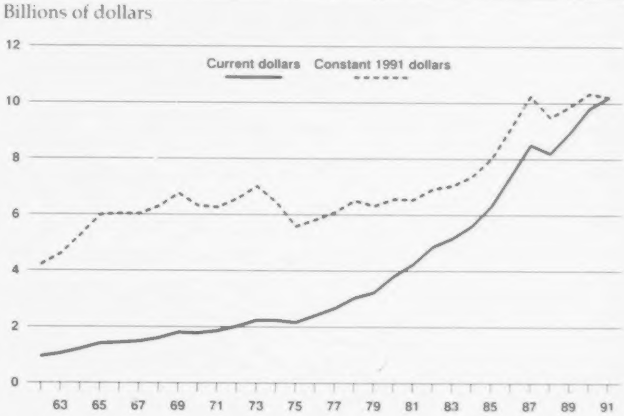

Figure 2

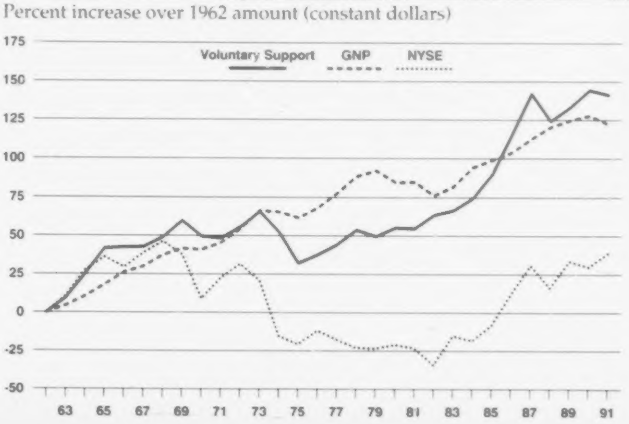
Changes in Estimated Voluntary Support in Relation to GNP and NYSE Index



- As the Gross National Product (GNP) increases, so eventually does voluntary support.
- But the performance of the stock market (measured by the New York Stock Exchange Index) is a better short-term predictor of voluntary support. The dips and rises of the stock exchange tend to be mirrored by voluntary support within a year.
- The relationship of voluntary support to economic trends becomes clearer if gifts for current operations and capital purposes are viewed separately (Figure 3).

Current Operations vs. Capital Purposes

▬ Support for current operations climbed 7 percent, a little less than in 1990 (Table 2). In constant 1991 dollars (HEPI) the increase was 2 percent.

- Over the past thirty years, gifts for current operations have climbed almost every year.
- Shifts in support for current operations tend to mirror shifts in Gross National Product (Figure 4). For instance, the drop from 1973 to 1975 coincides with a recession. Without necessarily implying any causal relationship, GNP has been a good long-term predictor of gifts for current operations.
- Given that the 1991 academic year falls within a recessionary period, the results are surprisingly strong and suggest that another factor is boosting giving for current operations. Since the constant dollar increase in current operations gifts is largely attributable to individuals, it may be that we are seeing positive effects of the aging baby-boom generation and the increased alumni base. In a recovered economy we can

(Figures in parentheses are percentages of total.)

HEPI (Higher Education Price Index) source: Research Associates of Washington.

perhaps expect to see even stronger increases in giving for current operations.

▬ Support for capital purposes (buildings and equipment, endowment, retirement of debt), which is often provided in the form of large gifts of appreciated property (particularly securities), was essentially unchanged in 1991. In constant dollars (HEPI), a 5 percent drop was registered (Table 2).

- Gifts for capital purposes rose 12 percent in 1990. The stock market performed much better in the 1989 calendar year (+15 percent) than it did in 1990 (-3 percent).
- Without necessarily implying a causal relationship, stock market performance is a good predictor of gifts for capital purposes (Figure 5), probably serving as an indicator of individuals' and foundations' perceptions of accumulated wealth. Individuals are responsible for almost two-thirds of capital purposes gifts.

Sources of Support

▬ Voluntary support trends are also clarified if support is broken down by major donor groups (Figure 6 and Table 2):

- Alumni donations rose 6 percent in 1991 (versus 11 percent in 1990) and accounted for 26 percent of the year's total support. In constant 1991 dollars alumni support was up slightly.
- Non-alumni individual donations rose 4 percent (versus 7.5 percent in 1990) and accounted for 23 percent of all support. This represents a 1 percent decline in constant dollars.
- Together, alumni and non-alumni individuals (the sources of half of all voluntary support) gave over 4 percent more than in 1990, but not enough to keep pace with inflation.
- Also contributing to the overall rise, corporations (the third-ranking donor category at 22 percent of the total) increased their support of higher education by 3 percent in 1990 to $2.23 billion, down from the previous year's 11 percent increase — and clearly reflecting reduced corporate profits.

  — Until the late 1970s, shifts in corporate contributions to all causes followed corporate pretax income rather closely, staying below 1 percent of PTI. However, corporate contributions have risen dramatically since then while pretax income has languished (Figure 7). Since 1982, corporate contributions to all causes have ranged between 1.7 and 2.2 percent of PTI, unprecedented levels. However, these figures reflect more than an increased corporate commitment education and other social causes.

  — During the 1980s, there was dramatic growth in the size of losses reported by companies operating at a deficit. For instance, operating losses were $58 billion in 1980 and $137 billion in 1987.

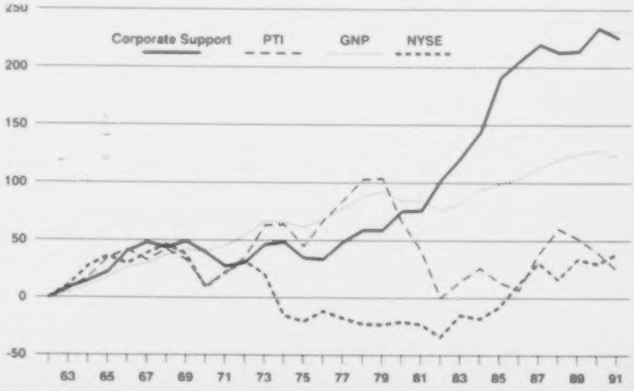
Changes in Estimated Corporate Support in Relation to Major Economic Indicators

Percent increase over 1962 amount (constant dollars)



- — The 1987 PTI figure of $275 billion is the net of a positive $412 billion reported by profitable companies less $137 billion in losses reported by companies operating at a deficit.
- — If the deficit figures are backed out of the PTI figures for the 1980s, the ratio of contributions to PTI drops to around 1.25 percent, still a significant increase over the pre-1980 historical level and probably a better indicator of the increased corporate commitment to social causes.

- Foundation giving, estimated at $2.03 billion, rose 6 percent and constituted 20 percent of contributions to higher education — a share that has been growing now for three years after several years of decline (Figure 8).
- Donations from religious organizations (included with the "Other Organization" category in the figure), were flat after rising 1 percent in 1990 (but they did register a hefty 20 percent increase in 1989), and giving by "other" organizations (clubs, unions, fund-raising consortia, etc.) climbed 1 percent. Religious and other organizations together accounted for about 9 percent of total voluntary support.

Trends for Two- and Four-Year Institutions

The trends presented in this section have so far concerned higher education viewed in the aggregate. As colleges and universities well know, these aggregate trends do not always obtain for all types of institutions or for all institutions within a given type.

- The Council has not in the past estimated total giving to each type of higher education institution that it tracks through the annual Voluntary Support of Education survey (public and private research/doctoral universities, comprehensive universities, liberal arts colleges, and the rest).
- When practicable, the Council for Aid to Education will begin publishing national estimates by type of institution. As a step in that direction, separate estimates for two- and four-year institutions are presented on pages 8 and 9. (Separate estimates for just 1991 for public and private two- and four-year institutions can be found in Table 1.)

Four-year institutions:

- Total expenditures, both capital and operating outlays, are estimated to have been $134.1 billion in the 1991 academic year (derived from Department of Education figures), an increase of 6 percent over the previous year and the smallest year-to-year increase since at least 1972 (see Table 3a).
- Expenditures per student, adjusted for inflation, dropped 2 percent from the previous year.
- Voluntary support per student stood at $994 (constant 1991 dollars) in 1971. It fell to a low of $788 in 1976, but has been climbing since and currently stands at $1,160, down 3 percent from last year.
- After reaching a low of 6.3 percent in 1975, voluntary support as a percent of expenditures has been moving upward and currently stands at 7.4 percent.
- Over the longer run, voluntary support should continue to grow as a percentage of expenditures, given slow enrollment growth, pressures to control expenditures, and continuing increases in giving from the major donor categories. But annual growth in good times will be on the order of tenths of a percent of expenditures.

Two-year institutions:

- Total expenditures, both capital and operating outlays, are estimated to have been $21.5 billion in the 1991 academic year (derived from Department of Education figures), an increase of 4 percent over the previous year and the smallest year-to-year increase since at least 1972 (see Table 3b).
- Expenditures per student, adjusted for inflation, were down 3 percent from the previous year.
- Voluntary support per student is estimated to have been $59 (constant 1991 dollars) in 1972. It fell to a low of $31 in 1981, but has been gradually moving upward since and currently stands at $60. These estimates should be considered quite tentative given the low participation rate of two-year institutions in the survey.
- After reaching a low of 0.8 percent in 1975, support as a percent of expenditures has been slowly climbing and currently stands at 1.4 percent.

Future Trends for Higher Education

Support for current operations, which has remained surprisingly strong in spite of the recession, should climb faster when and as the overall economy improves. But it will probably show less growth in 1992 than in 1991. Gifts for capital purposes, which reflected the weak 1990 stock market, should make a better showing in 1992 since the stock market climbed 12.5 percent in 1991.

A return to the double-digit surges experienced during much of the 1980s is not expected until the stock market has undergone another sustained climb and the overall economy is healthy; that is, double-digit surges are not to be expected any time soon.

Given increased competition for voluntary support dollars from other sectors of the non-profit community, yearly constant dollar growth will probably average in the 2-4 percent range under generally positive economic conditions.

What does appear likely and worthy of continued attention is the increasing competition among different types of educational institutions (public and private, research/doctoral, comprehensive, and others) for support from the different categories of donors (individuals, corporations, foundations, and the rest).

- As we have been suggesting in recent reports, educational institutions will define their missions more precisely and sharpen the focus of their appeals.
- Donors will likewise clarify their missions and more narrowly focus their support.
- The Council has undertaken research to follow more closely the changing relationships between donors and types of institutions.

Elementary and Secondary Education

▬ Multi-year trends in voluntary support of elementary and secondary education do not yet exist. As a step in that direction, Table 1 (see page 2) presents estimates (some quite tentative) of support and other vital statistics for various segments of the precollege sector.

- If survey participation increases among the segments of the precollege sector, the Council will refine these estimates and provide further detail.

* Source: Adapted from Department of Education figures (full- and part-time, not FTE).

**Derived from Department of Education figures and revised from last year.

It is the Council's expectation that support for many of these segments will increase during the 1990s at a pace comparable to or faster than that of higher education.

- Support of private independent schools may be an exception. Given their already relatively strong level of support, they will probably have to compete more vigorously in order to maintain their relative advantage.
- Other private segments, however, appear positioned to develop more effective appeals for support from donor groups that traditionally have not recognized the values and needs of these segments.
- It needs to be mentioned again that voluntary support for improving public elementary and secondary education will often not take the form of contributions to the schools themselves. Rather, support will go to education-related organizations and higher education institutions (and be counted in their voluntary support) that provide research, training, consulting, advocacy, and other services targeted at public school restructuring and reform.

(Figures in parentheses show percent of total in each column.)

Who Gave the Support

- Contributions from almost all sources rose modestly in 1991. Table 5 presents 1991 survey results in comparison to 1990. Since no single source group accounts for a preponderance of support and since different source groups are subject to different economic and other influences, stability is built into the annual support stream.

- Table 6 shows the allocation of support from the different source groups ~~to the~~ different types of institutions.

- Table 7 displays the relative importance of the different source groups to each type of institution by showing the support received from each source group as a percent of the total support received by each institutional type.

Restrictions Placed on Support by Donors

- Table 8 shows voluntary support by donor-specified purpose for colleges and universities participating in the 1991 survey, with comparative data from the previous year. See pages 5-6 for a discussion of trends behind giving for current operations and capital purposes.

- Table 9 displays, for each type of institution, per student support received from each source for each purpose. By putting its own voluntary support results on a per student basis, any institution can compare its pattern of voluntary support to the norms for its institutional type presented in this table. (Two-year institutions were not asked to report restricted current operations gifts by purpose.)

- Table 10 gives specifics on the number of institutions reflected in Table 9 and provides enrollment, endowment, and expenditure data for this group of institutions. If you

wish to make comparisons in Table 9 on a per full-time-equivalent (FTE) student basis, divide the dollar amounts in Table 9 that you are comparing to your own institution's FTE dollar amounts by the FTE ratio.

▬ Table 11 shows the distribution of gifts made to endowment with a restriction on the use of the income that endowment earns. For all types of institutions except public specialized institutions, student financial aid is the category receiving the most gifts. For public specialized institutions (almost all are medical centers), research is the favored category.

Restricted Giving Fuels Current Operations Support

▬ In a recent study, the Council for Aid to Education explored trends in giving for current operations using a group of 290 institutions that participated in the VSE survey in each of the last twenty years. The results are unlikely to be a surprise to anyone working in the fund-raising arena.

- Among the 290 institutions, almost all of the growth (in constant dollars) in current operations giving has occurred through increased restricted gifts (Figure 13). The relatively small growth in unrestricted current operations dollars is attributable to gifts from individuals, especially alumni.
- For private liberal arts and comprehensive institutions, unrestricted gifts to current operations have climbed more closely in line with the restricted gifts, although still not at the same pace. Unrestricted giving has done better with these two types of institutions because they are more dependent on gifts from alumni and other individuals, the sources that have increased giving to the unrestricted category.

- For the research/doctoral institutions, however, which are more heavily supported by corporations and foundations, current operations unrestricted gifts have actually declined while restricted giving has taken off. And restricted gifts account for a preponderance of all the dollars for current operations.

▬ The general lesson from the data is that program-driven or targeted giving for current operations climbed sharply during the last ten or so years, especially from corporations and foundations. Undifferentiated, non-targeted appeals to corporations and foundations were and are unlikely to be successful. While still effective with alumni, and to a lesser extent with other individuals, the evidence points to the need for clearer and more precisely defined appeals in order to capture the attention of corporate and foundation donors.

Special Forms of Giving

▬ The Voluntary Support of Education survey collects data on special forms of giving and tracks them over time. Included are bequests and deferred gifts from individuals, matching gifts from corporations, and noncash gifts from both businesses and other sources.

- **Bequests.** The proportion of contributions in the form of bequests varies randomly over time, staying within the range of 20-25 percent of total individual giving. Table 12 presents data for the last decade. Appendix Table A contains more detailed information on bequests by type of institution.
- **Deferred Gifts.** Table 12 also presents data on deferred gifts for the last decade and Appendix Table A provides data by type of institution.

(Numbers of institutions providing complete data are in parentheses. Two-year institutions were not queried.)

- **Matching Gifts.** The share of corporate support received from businesses through employee matching-gift programs held steady in 1991 at 8.9 percent, and the average match rose from $285 to $292 (see Table 13). Colleges and universities reported receiving $147.3 million in matching gifts in 1991; when the Council first began tracking these data in 1966-67, matching gifts amounted to $4.2 million, just 2 percent of all corporate giving.
  - — Figure 14 shows factors behind the growth in matching gift dollars. As can be seen, the increase has been a function of the number of gifts made, not the average size of gifts. The number of gifts made has been a function of the number and size of companies offering matching gift programs, their eligibility policies, and the size of the alumni base (which is also a proxy for the growth in the number of non-alumni individuals who make matchable gifts). Growth in the number of gifts that is not attributable to the above factors must be attributable to a greater tendency for individuals to make gifts and to take advantage of matching-gift programs. Promotion by both corporations and educational institutions has undoubtedly enhanced this tendency.

Total All Institutions	968	$1,657,949	21.0	$147,299	8.9	$152,168	$292

* Because many companies match gifts at a ratio of $2 or sometimes $3 for every employee dollar, the average match is estimated to be about half again as much as the employee's gift.

— Matching-gift dollars are particularly important to the private liberal arts institutions, accounting for 35.9 percent of corporate grants in 1991. Corporate matching dollars are more substantial at private institutions since they are driven by individual gifts, which historically have been much greater at private institutions. However, corporate matching dollars will gain significance at public institutions as this difference continues to diminish.

- **Gifts of company products.** These gifts rose 11 percent to $270 million from $243.2 million in 1990 ($182.5

* These data reflect the amounts reported only by those institutions providing complete answers.

** Donors as a percent of alumni asked to give.

million in 1989). Details by type of institution can be found in Appendix Table A.

- **Corporate property gifts.** These gifts, usually large, nonrecurring contributions of land, buildings, and equipment, climbed 36 percent to $90.5 million in 1991 from $66.5 million in 1990. Details by type of institution can be found in Appendix Table A.
- **Non-cash gifts from non-corporate sources.** These gifts come primarily from individuals; they include gifts of securities, land, houses, paintings, antiques, and rare books. In 1991 the total reported value of these gifts was $348 million, up 26 percent from $275.5 million in 1990. Details by type of institution can be found in Appendix Table A. Results may not be exactly comparable to previous years because of a change in instructions regarding securities.

Size of Gifts

▬ Many of the institutions participating in the survey provide details about gifts from individuals for current operations that were under $5,000, or $5,000 and over.

- Table 14 shows the totals and average gifts by type of institution. The average gift under $5,000 was $126 in 1991, versus $121 in 1990 — an increase of 4 percent. The average gift over $4,999 was $24,719 in 1991, versus $21,668 in 1990 — an increase of 14 percent.
- In general, the growth in individual giving in constant dollars during the past 20 years has been more a function of greater numbers of contributors than of larger gifts on average. Since the 1950s, the growth in alumni contributions correlates rather well with the growth in the alumni base. Average alumni gift size in constant dollars, on the other hand, has hardly changed. This is not surprising when one considers both the steady low average age of the alumni base and the generally poor performance of the stock market during this period. And the factors explaining alumni giving largely hold also for other individuals (see Volume 1 of the 1990 VSE report for more information on alumni giving trends and projections).

Alumni Giving

▬ To facilitate analysis of alumni fund raising, colleges and universities report additional data on the number of alumni of record, the number actually solicited, and the number making a gift. These data are used to calculate the percentage of donors relative to the number actually asked for support — the "solicitation-effectiveness ratio" — and average alumni gift size. In 1991 solicitation effectiveness dropped by 1 percentage point while the average gift climbed more than 9 percent (see Tables 15 and 16, and Appendix Table A).

Very Large Gifts

▬ Information on the largest gifts is also collected in the survey, but has not been reported in detail before. Institutions are asked to list their three largest gifts from living individuals, from bequests, from foundations, and from corporations. These relatively few large gifts are of crucial importance; in 1991 the sum of the twelve largest gifts to each institution accounted for 31 percent of all the gift income reported by 782 institutions supplying complete data. Table 17 shows, by type of institution, the percent of all gifts from each source that these three largest gifts represented.

Gifts from Governing Board Members

Table 18 displays various statistics on gifts from governing board members or trustees by type of institution and shows the importance of these gifts, particularly for private institutions. For all institutions responding to this question, governing board gifts accounted for 16.5 percent of all individual giving.

Development Resources at Two-Year Colleges

Two-year colleges were asked three special questions in the 1991 survey (percent responding in the affirmative to each question are indicated below):

	Public	Private
Do you have an active foundation?	96%	11%
Do you have at least one full-time professional development officer?	66%	89%
Do you have an alumni association?	64%	83%

Elementary and Secondary Education

Introduction

Several changes in this section of the report warrant mention. First, a greater variety of elementary and secondary schools are included, reflecting the Council's efforts, in cooperation with various private school associations and their umbrella group, the Council for American Private Education, to make the VSE survey more inclusive. This is an effort that will continue over the next few years.

Historically, members of the National Association of Independent Schools (private schools governed by their own boards of trustees that are not a part of a larger school system) have been the predominant precollege schools participating in the VSE survey. However, over the years a number of other schools have asked to participate and the Council for Aid to Education has included them in the independent school analysis.

In conjunction with encouraging more inclusive participation, we are having to become more careful about keeping schools separated by type in order to facilitate intra-type comparisons. For this reason, private independent school participation, at 411, appears down considerably from last year's figure of 500. But the 1990 figure of 500 included 42 schools that were not members of NAIS, so 1990 NAIS participation was actually 458. Of this number, 115 schools chose not to participate in 1991 and 68 schools participated in 1991 that did not in 1990.

In addition to the 411 private independent schools, 165 other types of private schools (Catholic secondary, Friends, Lutheran, Seventh-day Adventist, etc., that are not members of NAIS) participated in 1991, a minority of which participated in 1990 or earlier years and were folded in with the private independent schools in those years. The picture is further confused by the fact that schools may have several affiliations; e.g., a schools can be a private independent and also a Friends or Catholic school. In the various school-type specific analyses that follow, we have always included all the schools identified as being of a certain type, regardless of whether that is their chosen primary or secondary affiliation. Thus the 411 NAIS member schools reported upon below include 35 that are also private independent Catholic schools, 12 that are Friends schools, etc. Likewise, a significant number of the independent Catholic secondary schools are also members of NAIS.

Comparisons between different types of schools are to be cautioned against at this time, if not at all times. There are many differences between these types of schools that affect the role played by, and amount received of, voluntary support.

Table 19

Total and Average Support by Type of Independent School, 1991

Type of School		Girls	Boys	Coeducational	Total
Day Elementary	Total	$ 604,504	$ 3,044,065	$ 18,227,579	$ 21,876,148

All Schools	Total	$58,116,384	$72,232,337	$317,112,643	$447,461,364
	Average	908,069	1,416,320	1,071,326	1,088,714
		(64)	(51)	(296)	(411)

(Figures in parentheses show number of schools reporting.)

Private Independent Schools

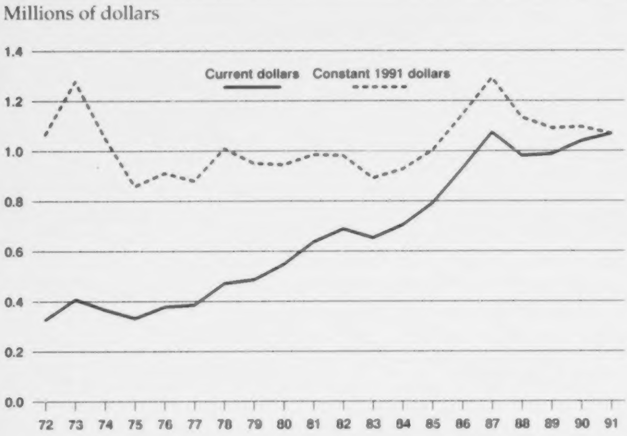
▬ 411 private independent schools provided at least partially usable responses to the 1991 survey of Voluntary Support of Education. A breakdown of total support by type of program and student body is shown in Table 19.

▬ Figure 15 depicts the 20 year trend in both current and constant dollar average support received per participating NAIS member school. The slopes of both lines through 1990 are the same as in last year's chart. However, the lines are somewhat higher this year because we are looking at just NAIS member schools, which tend to receive more support on average than non-NAIS member schools.

▬ Figures 16 and 17 show percentage changes over 1972 in per school average school support for current operations and for capital purposes (constant dollars). Comparable higher education trends are also shown, as are trends in Gross National Product (which correlates well with support for current operations) and the New York Stock Exchange Index (which is a good statistical predictor of support for capital purposes).

Figure 15

Total Voluntary Support Average per NAIS Member School Survey Participant



▬ As can be seen, the increases in giving to independent schools for both current operations and capital purposes have failed to keep pace with the increases in giving to higher education overall. However, in addition to reasons discussed last year, it is also worth noting that private higher education institutions have in general experienced very little growth in gift income per student over the past 20 years (see charts on page 11).

Sources of Support

▬ Table 20 presents survey results by source of support (see Appendix Table E for a breakdown of support by both source and type of school program). Not all 411 schools reflected in Table 19 provided sufficient detail to be included in this and following analyses.

- Since the number of survey participants varies from year to year, two types of analysis are used to explore changes over time. First, comparing averages per institution from year to year corrects for different numbers of respondents, but can be misleading if the samples for each year differ on important dimensions. This was, in fact, the case in both 1990 and 1991, with drops in participation each year largely occurring among schools with smaller development programs.
- Second, comparing results for just those institutions participating in consecutive surveys — a "core" group — corrects for sampling changes from one year to the next, but produces a smaller set of institutions that may not be typical of all independent schools. The "real" change for all independent schools lies somewhere in between the two measures, probably around a

Figure 16

Voluntary Support for Current Operations Independent Schools vs Higher Education

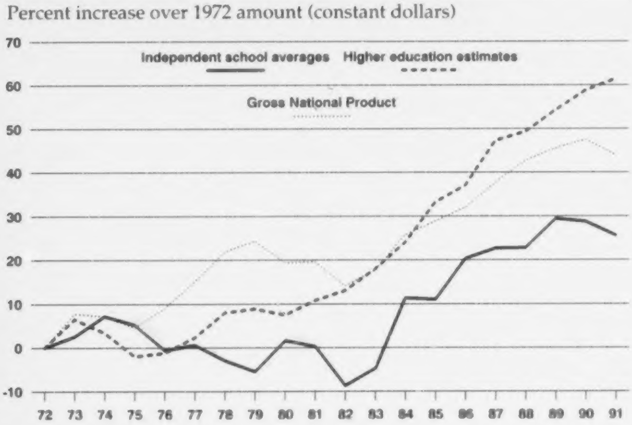


Figure 17

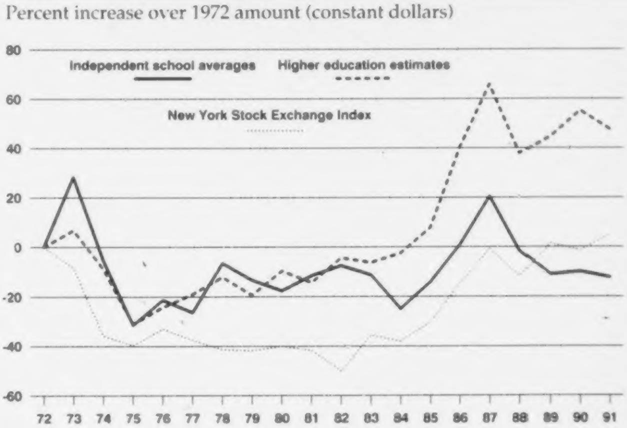
Voluntary Support for Capital Purposes Independent Schools vs Higher Education



3 percent increase in 1991 and therefore not enough to keep pace inflation, which rose 5 percent. The changes from one year to the next described below rely on the core comparisons.

- Gifts from alumni, up less than 2 percent in 1990, climbed 7.6 percent in 1991. Gifts from parents, which experienced robust growth in 1990 (11 percent), grew just over 1 percent in 1991. Gifts from other individuals, which had climbed less than 3 percent in 1990, fell almost 13 percent last year.
- Foundation grants, which rose 11 percent in 1990, climbed another 4 percent in 1991. Gifts from corporations, after falling about 11 percent in 1990, rose 3 percent in 1991. Donations from religious organizations, after dropping 24 percent in 1990 (after rising 37 percent in 1989), rose 5 percent. Finally, contributions from other organizations (clubs, fund-raising consortia, etc.), climbed 16 percent in 1991 after falling 28 percent in 1990.

Purposes of Support

▬ Table 21 shows changes in the purposes of gifts as restricted by donors.

- Contributions for current operations rose (as they have for the past few years), but only by about 3 percent in the core group, not enough to keep pace with inflation. The increase in 1990's core group was about 4.5 percent. As seen in Figure 17, gifts for current operations had been on a fairly steady upward climb since 1982, with a few pauses along the way. The recession has had a clear impact over the past several years, however.
- Contributions for capital purposes — buildings, equipment, endowment, and loan funds — also rose less than 3 percent, about the same as in 1990. As Figure 17 shows, gifts for capital purposes have fared poorly during the past 20 years, and in constant dollar terms still average below the 1971 level. In fact, these gifts followed the fortunes of the stock market quite closely through 1988. But gifts for capital purposes to independent schools have not shown a recovery during

Table 20

Voluntary Support of Independent Schools by Source, 1990 and 1991

Total All Sources	$441,251 (100.0)	$965,539	$433,722 (100.0)	$1,068,281	10.6	2.8
Number Schools Reporting	457		406			343

(Figures in parentheses show percent of total in each column.)

the past 3 years comparable to the recovery seen in such gifts to higher education.

- Table 22 displays the purposes designated by specific donor groups for their gifts. The pattern is very much the same as in recent years. Note that for independent schools a larger portion of their gift income is directed toward capital purposes (60 percent) than is the case with private higher education (closer to 50 percent). With this greater dependence on capital purposes gifts, overall independent school gift income is more affected by the stock market than is the case with higher education. And in real terms the stock market has not performed well over the past 20 years.

Special Forms of Giving

- Combined proceeds from **bequests** and **deferred gifts** (such as trusts, pooled income finds, and annuities) rose 6 percent in 1991, even with 88 fewer schools reporting. Bequests for current operations declined 80 percent, from $9.6 million in 1990 to $1.9 million in 1991. Bequests for capital purposes rose 46 percent, from $27.9 million to $40.7 million. Income from deferred gifts fell 21 percent to $7.9 million from $10.1 million in 1990 (see Appendix Table E for details by type of school).

- **Matching gifts** to private independent schools accounted for 48 percent of the total $17.3 million in corporate support reported by the 406 institutions included in Appendix Table E. Matching gifts totalled $7.9 million, down from $8.3 million last year (but with fewer schools reporting in 1991), and the average match, at $462, was up from $451 in 1990 (see Appendix Table E for details by type of school). * Gifts of company products and other property totalled $582,000 and $68,000 respectively, for a combined total of $650,000, compared to $695,000 in 1990. Together, product and property gifts comprised 4 percent of the corporate total, about the same as last year (see Appendix Table E for details by type of school).

- **Non-cash gifts from non-corporate sources** (which includes real and personal property such as land, houses, paintings, antiques, and rare books) rose from $5.3 million in 1990 to $5.6 million in 1991 (see Appendix Table E for details by type of school).

Number Schools Reporting	457		406			343

(Figures in parentheses show percent of total in each column.)

Alumni Giving

▬ Data on alumni giving for all purposes and for current operations by type of school are presented in Appendix Table E. Overall solicitation effectiveness (donors as a percentage of those solicited), at 32.4 percent, is similar to earlier years. Among the various types of schools, the boarding and boarding/day schools were most effective at alumni solicitation, reporting donations from 36.5 percent of alumni contacted. Day elementary schools had the lowest solicitation effectiveness rate, at 14.4 percent; all other types of schools reported rates around 30 percent. The average alumni gift rose to $504 from $466 in 1990, which was up from $450 in 1989. The average gift for current operations was $212, up from $193 in 1990, which was essentially unchanged from $191 in 1989.

Parent Giving

▬ Table 23 (new table) provides detail on parent giving for current operations in 1991 for 318 schools that appeared to provide reliable data. These schools accounted for $56 million (or almost 90 percent) of the $63 million in current operations gifts from parents reported by the 406 schools.

Trustee Giving

▬ Table 24 (new table) provides detail on trustee or governing board giving by type of school. The importance of trustee giving for each type of school is readily apparent.

Supplementary Data

▬ To facilitate studies of fund raising effectiveness, schools were asked for information on enrollment, endowment, total educational expenditures, and advancement-program expenses. Table 25 presents advancement-program expenses as a percentage of school expenditures and of total voluntary support by type of school. For all schools reporting these data, fund raising expenses in 1991 were 4 percent of school expenditures (unchanged from 1990 and 1989) and 19.3 percent of total giving (up from 18.2 percent in 1990).

▬ Data on total endowment and endowment per student by type of school are shown in Table 26. Average endowment per student climbed from $14,934 in 1990 to $17,578 in 1991. Differences in the samples between the 2 years may account for some of the increase.

Table 25

Reference Note on Summary Tables

- The following tables provide a summary of the survey results for each of the new private school segments included in the 1991 survey. For most segments the participation rate was quite low, so any generalization of the results to the whole segment must be considered risky. Moreover, for many of these schools, 1991 was the first year of participation and it is inevitable that many schools had their information classified in ways that required some interpretation for them to approximate the survey's reporting guidelines.

- With a few exceptions discussed below, the lines in the summary tables should be relatively easy to interpret and provide individual schools with the means of comparing their own fund raising performance to other schools within their segment. Keep in mind, however, that the statistics reported in each line are independently arrived at. In other words, for instance, the maximum column shows the largest value reported for each given variable from among all the schools in the segment--the whole maximum column does not reflect results of just one school.

- In the sections on bequests, planned gifts and non-cash, non-corporate gifts, the number of gifts is first reported, along with the number of institutions reporting such gifts, including those that reported no gifts of that type but excluding those schools that skipped the question. Then the table shows statistics on the dollar amounts of the type of gift in question. Here the number of schools reporting is the number with a dollar amount for the type of gift in question that is greater than $0. For instance, in the Independent Catholic Secondary Schools table, 60 schools responded to the questions on bequests. The mean or average number of bequests received per school was 1, but varied from a low of no bequests at half or more of the schools (since at least through the 50th percentile schools reported no bequests) to a high of 8 bequests at one school (the maximum reported by a single school). Statistics on the dollar amount of bequests is reported for 21 schools, the number of schools that received at least 1 bequest. Among these 21 schools, the average or mean total amount received in the form of bequests was $205,530, but varied from a low of $1,000 to a maximum of $2.78 million. Among the 21 schools, the median or 50th percentile school received a total of about $40,000 in bequests.

Independent Catholic Secondary Schools

- These 64 Catholic secondary schools (see Table 27) are like NAIS schools in their governance, and many are NAIS members and were also included in the NAIS section above.

Parish, Inter-parish, and Diocesan Catholic Secondary Schools

- These 83 schools (see Table 28) operate as part of a local Catholic school system. A special survey form was used by many, but not all, of these schools in 1991. This form allowed the schools to report gift income from religious sources in greater detail. Such support from one or more parishes or from the diocese is commonly referred to as a "subsidy" and can be a difficult amount to calculate and report, so the results must be treated with particular caution. Among these 83 schools, however, support from the parish(es) or diocese amounted on average to 91 percent of support from all religious organizations. On average, support from religious organizations accounted for 33 percent of all voluntary support.

- The special survey form also requested information regarding special event fund-raising amounts that would not normally be considered voluntary support (e.g., sales, bingo, etc.). For these 83 schools such revenue totaled an average of about $90,000 per school, over and above the gift income they reported for the 1991 academic year.

Schools for Exceptional Children

- These 10 schools (see Table 29) are all members of the National Association of Private Schools for Exceptional Children. These schools all serve children with disabilities.

Friends Schools

- These 14 schools (see Table 30) are all members of the Friends Council on Education. All have either Quaker majorities on their boards or are governed by a monthly Quaker meeting (a school committe).

Lutheran Schools

- These 8 schools (see table 31) are directly or indirectly hosted, governed and sponsored by congregations of the Evangelical Lutheran Church in America.

Military Schools

- These 8 schools (see Table 32) are all members of the Association of Military Colleges and Schools of the United States. Such schools have been approved by one of the armed services and have a member of the armed services detailed (or approved) by the Department of Defense, are accredited by their regional accrediting organization, and organize their student body as a cadet corps.

Seventh-day Adventist Schools

- These 32 schools (see Table 33) are all owned and operated by the Seventh-day Adventist Church and are accredited by the Board of Regents of the General Assembly of Seventh-day Adventists.

*Includes approximately $200 million faculty salary endowment grants.

**Includes $105 million nonrecurring transfer for unrestricted endowment.

***Includes $115 million bequests from alumni for capital purposes and $30.4 million gift-in-kind from a corporation for current operations.

****Includes a single gift of $100 million.

About the Council for Aid to Education

The Council for Aid to Education, Inc. is a tax-exempt, not-for-profit corporation dedicated to promoting an effective partnership between corporate and foundation funders and the education community in the task of improving America's educational system.

Founded in 1952 by the chairmen of Standard Oil Company of New Jersey (Exxon), General Motors, U.S. Steel (USX Corporation), the Container Corporation of America, and the Armstrong Cork Company, the Council was originally designed to encourage private-sector support of higher education. Today the Council has expanded its mission to become a resource for companies and private foundations interested in making effective contributions to the quality of American precollege and higher education. This broadened mission also includes the provision of a range of information services to educational institutions interested in cultivating private support.

Supported by large and small corporations as well as by private foundations, the Council helps education funders target key areas of educational concern and identify promising approaches to educational improvement. It points corporations and foundations toward the issues and opportunities in which they have a compelling interest and on which they can have an impact, and alerts funders to the implications of emerging educational challenges. By tracking trends and themes in private support of education over time, the Council can help private funders and educational institutions communicate with each other more clearly, plan more effectively, and assess the results of their efforts in a larger and more meaningful context. Through its publications, seminars, research, and consultations, the Council works to ensure that private investments in education produce results.

Table of Contents

Introduction 2

Notes on the Listings 5

Colleges and Universities

Research/Doctoral Institutions: The Carnegie Foundation for the Advancement of Teaching identifies four categories of universities ("Research I and II," "Doctorate-Granting I and II"), classified by the amounts of federal research support received and numbers of Ph.D. degrees awarded each year. The four are combined in this report.	*Public* *Private*	6 10
Comprehensive Institutions: There are two Carnegie categories of these colleges and universities offering bachelor's degrees (half in professional or occupational disciplines) and usually master's degrees as well. Category I enrolls more than 2,500 students; II between 1,500 and 2,500. The two are combined.	*Public* *Private*	12 18
Liberal Arts Institutions: Two categories of primarily undergraduate colleges (one more selective than the other) that award more than half of their bachelor's degrees in arts and science fields. The two are combined.	*Public* *Private*	24 24
Professional and Specialized Institutions: These are baccalaureate and postbaccalaureate institutions with programmatic emphasis in a single specialized field such as business, theology, engineering, law, medicine, or art.	*Public* *Private*	34 34
Two-Year Institutions: These community, junior and technical colleges offer certificate and degree programs through the Associate of Arts level and, with few exceptions, do not offer the baccalaureate degree.	*Public* *Private*	38 42

Elementary and Secondary Schools Schools are listed with the affiliation group they chose, but some schools have multiple affiliations.

Catholic Secondary Schools: Members of the National Catholic Educational Association, these schools may operate under the auspices of a single parish, several parishes, a diocese, or may be privately governed, in which case they may be a member of the National Association of Independent Schools.	44
Exceptional Children, Schools for: Members of the National Association of Private Schools for Exceptional Children.	48
Friends Schools: Operate under the auspices of the Friends Council on Education.	48
Independent Schools: Private, not-for-profit elementary and secondary schools that do not receive tax or church money and are each independently governed by a board of trustees. Almost all are members of the National Association of Independent Schools.	48
Lutheran Schools: Operate under the auspices of the Evangelical Lutheran Church in America or, in one instance, the Lutheran Church—Missouri Synod.	60
Military Schools: Members of the Association of Military Schools and Colleges of the United States.	60
Seventh-day Adventist Schools: Operate under the auspices of the General Conference of the Seventh-day Adventist Church.	62

Introduction

The Voluntary Support of Education survey is designed to obtain information on the amounts, sources, and purposes of private gifts, grants, and bequests received by educational institutions. Voluntary support excludes income from endowment and other invested funds, support received from federal, state, and local governments and their agencies, and contract research.

The 1991 survey collected data on funds raised from private sources for the fiscal year beginning July 1, 1990 and ending June 30, 1991 (with a few of the institutions reporting on different fiscal calendars). Questionnaires were mailed to almost 3,000 institutions of higher education and over 2,600 private elementary and secondary schools (see Table A). The precollege mailing was more than double that of past years as the Council seeks to expand the universe of schools surveyed. College and university participation was 44 percent overall, but varied considerable by type of institution (see Table B). Total elementary and secondary school participation was 22 percent, and also varied considerably by type of school (see Table C). Institutions submitting questionnaires too late to be reported in the pages that follow, or that received no voluntary support, are listed in Table D.

In no year since the survey was begun in 1954-55 have as many as half of the institutions of higher education responded. In recent years, the actual response has numbered between 1,000 and 1,200 colleges and universities out of approximately 3,000 invited to participate. Despite yearly fluctuations in both size and composition of the group of institutions participating, the Council estimates that the amounts reported have averaged about 85 percent of the total voluntary support received by all colleges and universities (an estimate confirmed in 1989 with a follow-up survey to non-respondents). The Council is working with various higher education associations to encourage greater survey participation.

The response rate for elementary and secondary schools is not neatly comparable to prior years because of the groups of schools newly invited to participate. In general, there was some small decline in private independent school participation. For the rest of the groups, this year establishes a baseline for gauging future increases in participation. The Council is working with a variety of associations to increase participation among these schools.

Since 1990, the Council's annual report on the Voluntary Support of Education survey has been split into two volumes. This volume, containing detailed results by each institution, is published first in order to put useful information into the hands of participants as rapidly as possible. *Volume 1: National Estimates and Survey Summary* typically follows volume 2 within three to four months. Volume 1 is mailed on a complimentary basis to all survey participants.

Listing Affiliation	None	Friends	Exceptional	Military	Catholic	Independent	Total Membership Invited (1)
Catholic Secondary	1279			1		9	1303
Exceptional Children	205	2				2	208
Friends	39					19	70
Independent	886	5	1	1	14		951
Lutheran	131						131
Military	16					14	32
Seventh-day Adventist	53						53
Total Unique Schools	2609						

NUMBER PARTICIPATING		Additional Affiliation					Membership		
Listing affiliation	None	Friends	Exceptional	Military	Catholic	Independent	Participation (1)	Rate	Number of Schools Listed (2)
Catholic Secondary	118			1		9	133	10%	96
Exceptional Children	10					1	12	6%	7
Friends	3					7	15	21%	13
Independent	372	5	1	1	5		405	43%	384
Lutheran	16						16	12%	6
Military	2					4	8	25%	6
Seventh-day Adventist	33						33	62%	27
Total Unique Schools	554								539

(1) Totals for a particular affiliation group are the sum of as many as three figures in the table: schools in the listing group with no additional affiliation, plus schools in the group with an additional affiliation, plus schools in another listing affiliation group with the affiliation in question as an additional one.

(2) Some elementary and secondary schools requested that their data not be listed.

Table D

Additional Respondents — Voluntary Support of Education, 1991

Institutions Not Tabulated (Reporting Too Late or in Grand Total Only

Four-Year Colleges & Universities	
Chapman University (CA)	$7,655,316
College of St. Catherine (MN)	3,165,510
Juniata College (PA)	3,129,785
University of North Carolina-Charlotte (NC)	2,721,144

Two-Year Colleges	
Bethany Lutheran College (MN)	$1,687,196
Northeast State Technical CC (TN)	383,360

Elementary and Secondary Schools	
Bancroft School (MA)	$233,228
Fenn School (MA)	540,329
Friends School-Mullica Hill (NJ)	81,601
Good Shepard Lutheran School (NY)	14,000
Maplewood Academy (MN)	445,352
Notre Dame High School (WV)	14,000
St. Agnes Academy (TX)	76,941
St. Gregory College Preparatory School (AZ)	439,589

Institutions Reporting No Support

Two-Year Colleges
- Arkansas State University-Beebe (AR)
- Jefferson Technical College (OH)
- Kennebec Valley Technical College (ME)

Elementary and Secondary Schools
- Bishop Grimes High School (NY)
- Cliffwood School (TX)
- Luther High School North (IL)
- Monsignor Nolan High School (TX)
- Our Lady of Fatima High School (RI)
- Our Lady Star of the Sea High School (MI)
- Shepard of the Valley Lutheran School (CA)
- St. Clement Schools (MI)
- St. Martin's Lutheran Church School (MD)
- St. Paul Lutheran School (IN)

Notes on the Listings

Catholic School Data

Catholic schools reported gift income somewhat differently from the rest of the elementary and secondary schools and these differences are reflected on the left page of the Catholic school listing. Endowment: Income Unrestricted, Endowment: Income Restricted, and Loan Funds are reported as combined total gifts to Endowment. Additionally, Catholic schools were asked to report gifts received from their parish and their diocese separately from gifts from other religious organizations.

Total Educational and General Expenditures

Column 26 does not show the total operating expenditures of the reporting institution; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises," as well as all outlays of a capital nature.

Endowment: Market Value

When an institution leaves the Endowment field blank on their survey form, it is often impossible to determine whether they mean zero (0) or NA. Even if the endowment figure for an institution is listed as zero (0), the institution may be endowed, but not have been able to report an Endowment: Market Value figure at the time of the survey.

Significance of Large Gifts to Higher Education

Column 29 in the College and University listing shows the sum of the 12 large gifts (the three largest gifts received from living individuals, from bequests, from corporations, and from foundations) as a percentage of total voluntary support received (column 1). If an institution did not provide complete large gift data, the entry is "NA."
